Booking an Implanon NXT® insertion, removal or replacement at The Crane General Practice

Please refer to this flow chart to organise an Implanon NXT® insertion, removal or replacement at our clinic. For more information about Implanon NXT®, please click [here](#).

Pre-procedure appointment with our doctors

This is compulsory to ensure you understand the procedure and any potential complications from the procedure. During this appointment, you will sign an informed consent form for the procedure and you will be provided with a prescription for the Implanon NXT® if required.

Appointment type: 15 minute phone/video/face-to-face consult

Duration of appointment: 15-20mins

Fees: Please refer to the 'Fees' section on our website

You can book your pre-procedure consult online by clicking [here](#) or you can call our friendly team on 90883258.

If you are having an insertion/replacement, please purchase Implanon NXT® from your pharmacy with your prescription and bring along to your procedure appointment. PBS cost of Implanon: approximately \$41.30.

Implanon NXT® insertion or replacement appointment

Implanon NXT® is best inserted between day 1-5 of your cycle. Please ensure you bring your Implanon NXT® with you on the day. It is important to ensure you are not pregnant before Implanon NXT® is inserted so you will require a urine pregnancy test (unless you are menstruating). Please come with a full bladder and request a urine jar from reception on arrival to collect your urine sample while waiting for the nurse and doctor.

Duration of appointment: allow 30-45 minutes

Fees: Please refer to the 'Fees' section on our website

Implanon NXT® removal only appointment

Duration of appointment: allow 30-45 minutes

Fees: Please refer to the 'Fees' section on our website

All fees include doctor's time, nurse's time, consumables & instrument sterilisation.

Aftercare

You will receive a text message after your procedure with a link to aftercare instructions. You may also access these instructions by clicking [here](#).
