Medicare pre-requisites for Mental Health Care Plan Reviews:

- a) Progress report from your treating psychologist**
- b) Previous Mental health care plan if this was done at another GP clinic**

Medicare requires your treating psychologist to provide your GP with a progress report before your GP can review your mental health care plan.

Please ensure we have received this report before your appointment to avoid wasting your time and money.

If your initial mental health care plan was done at another clinic, we also require a copy of this before your appointment.

It is your responsibility to ensure we have received the necessary documents detailed above before your appointment. Failure to do so will mean your GP cannot complete the review of your mental health care plan and you will have to rebook once you have facilitated the delivery of the documents to us.

Thank you for your understanding.

The Crane General Practice.
